

Americall Group, Inc., a Delaware Corporation, of which I am a founder and President, and employs almost 5,000 persons in the U.S., is opposed to the proposed change of rule by the FCC. We feel that it will create redundancy with the Staes and the DMA's Do Not Call lists, add a financial burden to the operators, and endanger the jobs of those 5,000 people. A better approach would be to work in cooperation with the DMA.
